**Subject:** 100 Radon Test Kit Challenge program free for community residents

Mayor Horn and Council,

We wanted to reach out to see if your community may be interested in taking advantage of our free program the we offer to help your residents test their home for radon.

*Take Action on Radon* is a national awareness initiative funded by Health Canada. As part of our work we have started an initiative which works with communities to provide radon test kits for their residents. The **100 Radon Test Kit Challenge** targets municipalities across Canada where radon testing has thus far been limited, but where there is a potential for homes to have elevated radon levels. The program will provide for free 100 test kits with resources and support for roll-out of the program to each participating municipality. Test kits are to be distributed to citizens for free or for a nominal fee. Each community needs to have a Community Liaisons to take on this project in their community and provide local support.

Do you want your community to participate in the 100 Radon Test Kit Challenge? [Apply for the fall of 2022 here](#). If you are interested in participating, we still have room for a few more communities but our list is filling up so don't delay!

Find more information on our website, <https://takeactiononradon.ca/100-radon-test-kit-challenge/> or download a more detailed information package here: [100 Radon Test Kit Challenge Information Package](#)

Please feel free to contact me if you have any other questions. We also have an information package for your council that you can share the information with them or we would be happy to do a presentation for a council meeting.

Thanks,

Pam Warkentin

Project Manager, Take Action on Radon
