 -  ALLUVIAL FANS

- Due to map scale, some areas adjacent to Fraser River (not visible on map) may be in Floodplain.

- Floodplain is the green area adjacent to the Fraser River and connected watercourses.

- Fraser River and connected watercourses are blue.

- Numbers along Fraser River are the 200 year flood elevations or dike design flood elevations in meters above sea level. These numbers include 0.6 meter of freeboard or extra height that is incorporated into dike design as a factor of safety, to protect against damage by floating debris and to allow a safe driving surface.

SILVER CREEK INDUSTRIAL PARK LOCAL EXEMPTION AREA
